

AUTOREPAIR PRO

Project Description:

Car maintenance is no longer a headache with AutoRepair Pro as it offers servicing, repair, and emergency towing services in a few clicks of a button. This case study investigates the problems that the solution solves for the customer, which made it possible for the users to book appointments and reach support effortlessly. With the utilization of high-end technology and fully automated service, AutoRepair Pro was successful in achieving extraordinary productivity with short service time and high customer satisfaction. Find out how the system dealt with the problems existing in the area, how it fulfilled the processes in such a way that no other system ever did in automotive support, and how it made such support useful and easy for every car owner.

Technology Used:

Frontend Technology:

Framework: React Js.

State Management: Global states like user authentication handled using Redux or Context API.

API Integration: Axios or Fetch API for back-end communication.

Backend Technology:

Node.js (RESTful API server)

Express.js: Used for routing and processing incoming requests.

MongoDB: Storage of user's information etc.

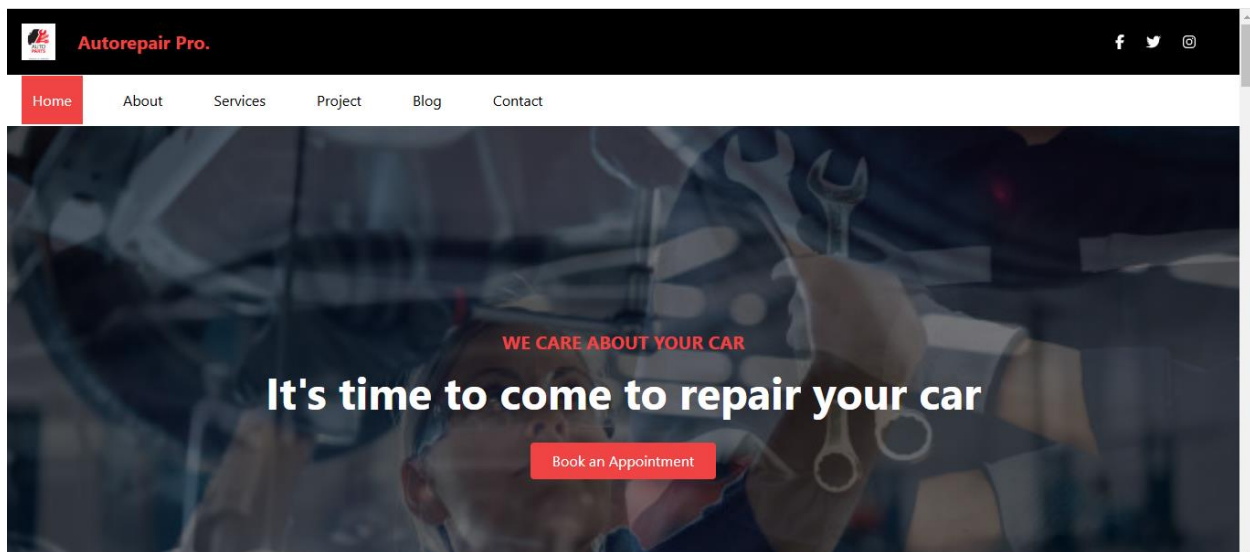

Authentication: JSON Web Token (JWT) is used to conduct secure log in, log out sessions.

Cloud Storage: Videos and other big files are hosted on AWS S3 or Google Cloud Storage.

Screens:

It includes a Header and Footer section. The screens available are Home, About, Services, Projects, Blog, and Contact, as listed below.

WELCOME TO AUTOREPAIR PRO

We help more than 45 years serving customer car

Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean.

[Our Mission](#)

[Our Vision](#)

[Our Value](#)

Our mission is to provide exceptional auto repair services with dedication, integrity, and customer satisfaction at the core of our work.
