

New Store Opening Process

Streamlining retail expansion with PowerAppsautomation

The Challenge

Traditional store opening processes were plagued by inefficiencies that delayed launches and frustrated stakeholders across departments.

Manual Paper Workflows

Cumbersome approval processes slowing down operations

Cross-Department Friction

Poor coordination between operations, finance, legal, and IT teams

Limited Visibility

No real-time tracking of approval status or bottlenecks

Key Features

Role-Based Access

Secure permissions ensuring appropriate visibility for Store Managers, Regional Managers, Finance, and Legal teams

Document Management

Upload and version control for lease agreements, licenses, and floor plans with automated organization

Multi-Stage Workflow

Coordinated approvals across legal clearance, lease review, IT setup, inventory planning, and finance

Smart Notifications

Automated reminders via email and Microsoft Teams ensuring timely stakeholder action

Store Opening Process Dashboard						
Project Name	Developer Name	Current Site Status	Status Milestone			
Project 1	LNT	Pending	HR Team Initial Requester	IT Team Supervisor	Operation Team Manager	CEO
Project 2	Birla	Pending				
Project 3	Tata	Approved				
Project 4	Reliance	Approved				
Project 5	DION	Pending				
Project 6	JICA	Pending				
Project 7	DSL	Rejected				
+ Add New Store						

User Experience: Store Manager Interface

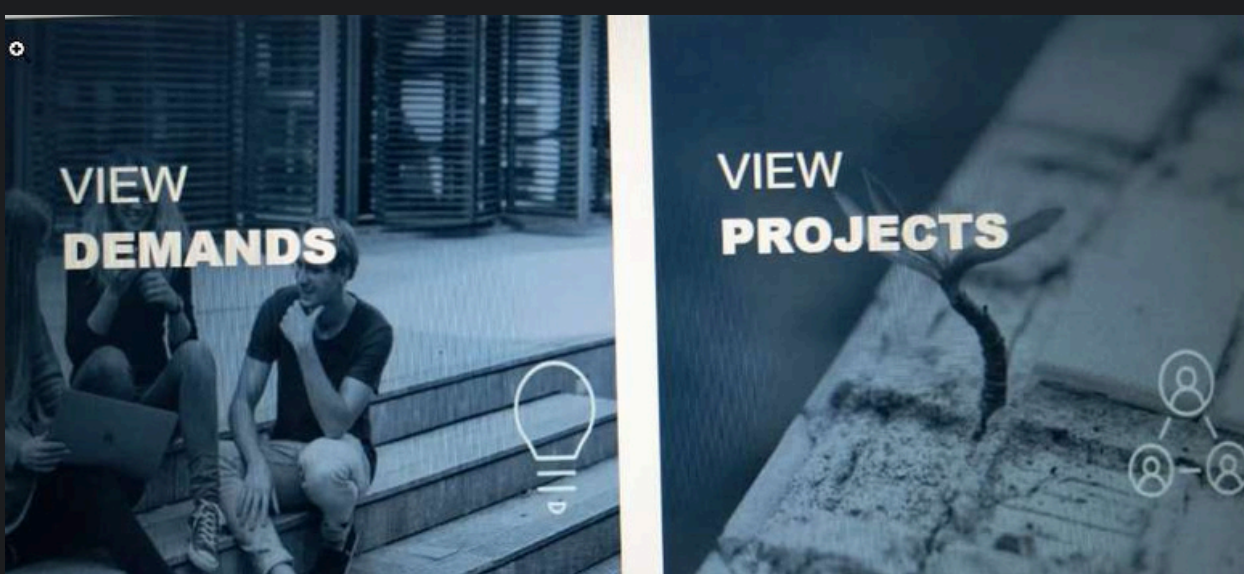

Intuitive canvas app designed for seamless store request management

Landing Screen

Clean dashboard allowing users to add new store requests and track existing projects with real-time status updates

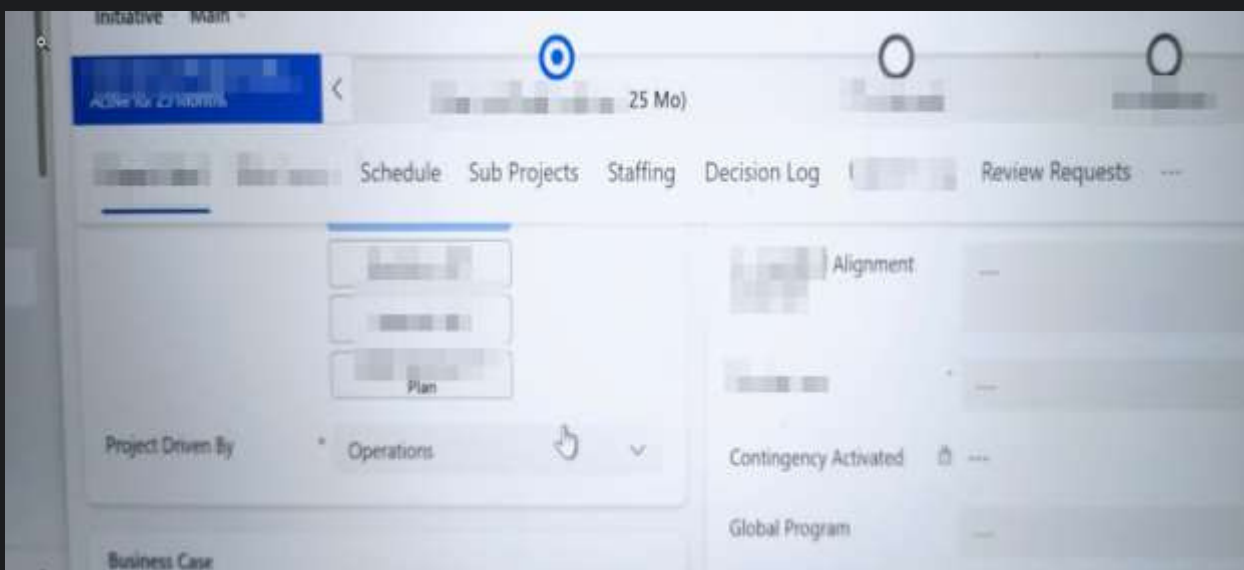

Project Tracking

Detailed project views accessible through navigation arrows, providing comprehensive visibility into approval stages

Approver Experience

Model-driven app optimized for performance, security, and administrative control

Enhanced Security

Dedicated model-driven environment with advanced security protocols for sensitive approval processes

Optimized Performance

Streamlined interface designed specifically for approver workflows and data management tasks

Administrative Control

Full monitoring and editing capabilities for approvers to manage store opening requests efficiently

Business Impact

40%

Reduction in store opening cycle time

24/7

100%

Digital Transformation

Complete elimination of paper-based
approval processes

Continuous visibility into approval
status and SLA compliance

Real-Time Tracking

Multi-Region

Scalable Solution

Handles complex multi-region and
multi-user workflows seamlessly

Enhanced Collaboration

Breaking Down Silos

The solution transformed cross-functional collaboration by providing shared visibility and automated coordination.

- Automated audit trails improve transparency and accountability
- Eliminated process bottlenecks through intelligent routing
- Enhanced stakeholder communication via integrated notifications
- Standardized processes across all departments and regions

Success Delivered

Transforming retail expansion through intelligent automation

Faster Launches

40% reduction in opening cycle time
accelerates market entry and revenue
generation

Operational Excellence

Streamlined processes eliminate
bottlenecks and improve cross-
department coordination

Scalable Growth

Future-ready platform supporting
multi-region expansion and evolving
business needs
