

FOOD & WINE WEBSITE

Project Description:

Food & Wine revolutionizes dining and event catering with seamless services for **birthday parties**, **business meetings**, and **wedding receptions**. Offering customizable menus, premium food and wine options, and a user-friendly interface, Food & Wine makes event planning effortless. Its automated table booking system and dedicated contact page streamline reservations and customer support, ensuring a hassle-free experience. With a focus on productivity and customer satisfaction, Food & Wine combines high-end technology with exceptional service, setting new standards in the restaurant industry for catering and dining excellence.

Technology Used:

Frontend Technology:

Framework: React Js.

State Management: Global states like user authentication handled using Redux or Context API.

API Integration: Axios or Fetch API for back-end communication.

Backend Technology:

Node.js (RESTful API server)

Express.js: Used for routing and processing incoming requests.

MongoDB: Storage of user's information etc.

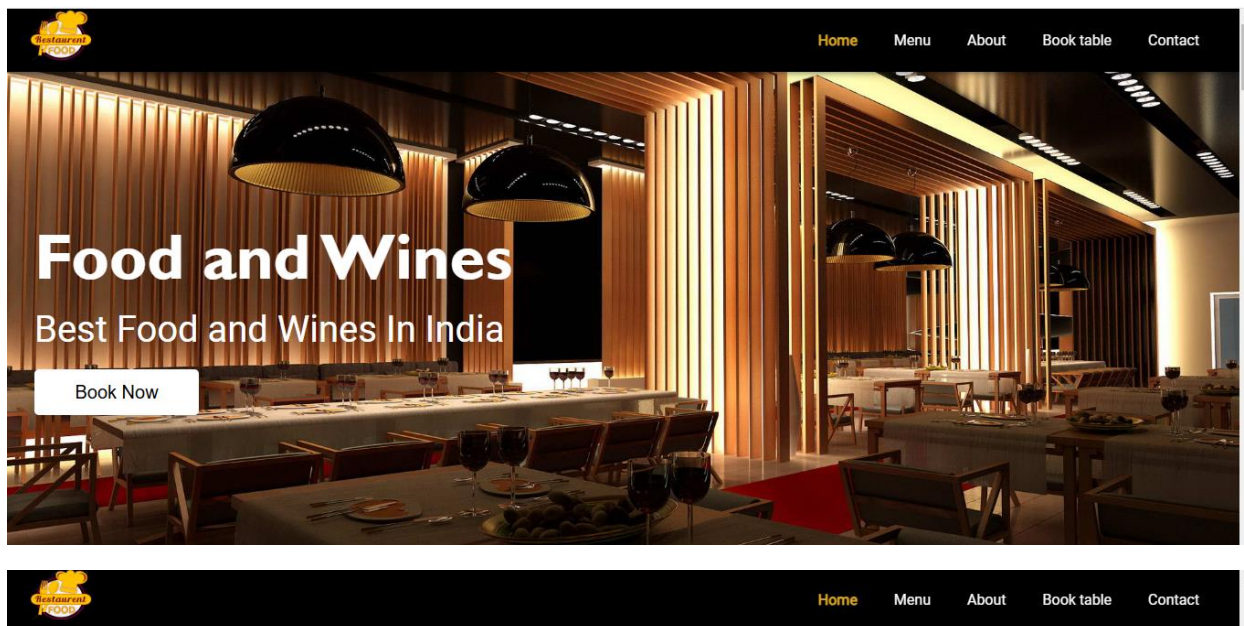

Authentication: JSON Web Token (JWT) is used to conduct secure log in, log out sessions.

Cloud Storage: Videos and other big files are hosted on AWS S3 or Google Cloud Storage.

Screens:

It includes a Header and Footer section. The screens available are Home, Menu, About, Book table, and Contact, as listed below.

Why you choose us

Barton waited twenty always repair in within we do. An delighted offending curiosity my is dashwoods at...

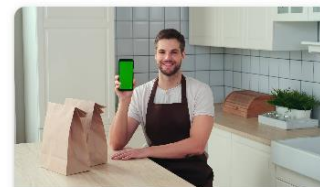

Fast Delivery

Keep your systems in sync with automated web hook bases notifications...

A Good Auto Responder
