

Shopping E-Commerce

Project Description:

A sleek and modern fashion and clothing shopping website designed to offer a seamless experience for style enthusiasts. Customers can explore a wide range of categories, including trendy apparel, accessories, and footwear for men, women, and kids. Key features include intuitive navigation, secure payment options, personalized recommendations, and order tracking. Sellers can efficiently manage inventories and promotional campaigns. With responsive design and multi-currency support, the platform ensures accessibility across devices. The site combines fashion trends with convenience, empowering users to shop effortlessly and stylishly.

Technology Used:

Frontend Technology:

Framework: React Js.

State Management: Global states like user authentication handled using Redux or Context API.

API Integration: Axios or Fetch API for back-end communication.

Backend Technology:

Node.js (RESTful API server)

Express.js: Used for routing and processing incoming requests.

MongoDB: Storage of user's information etc.

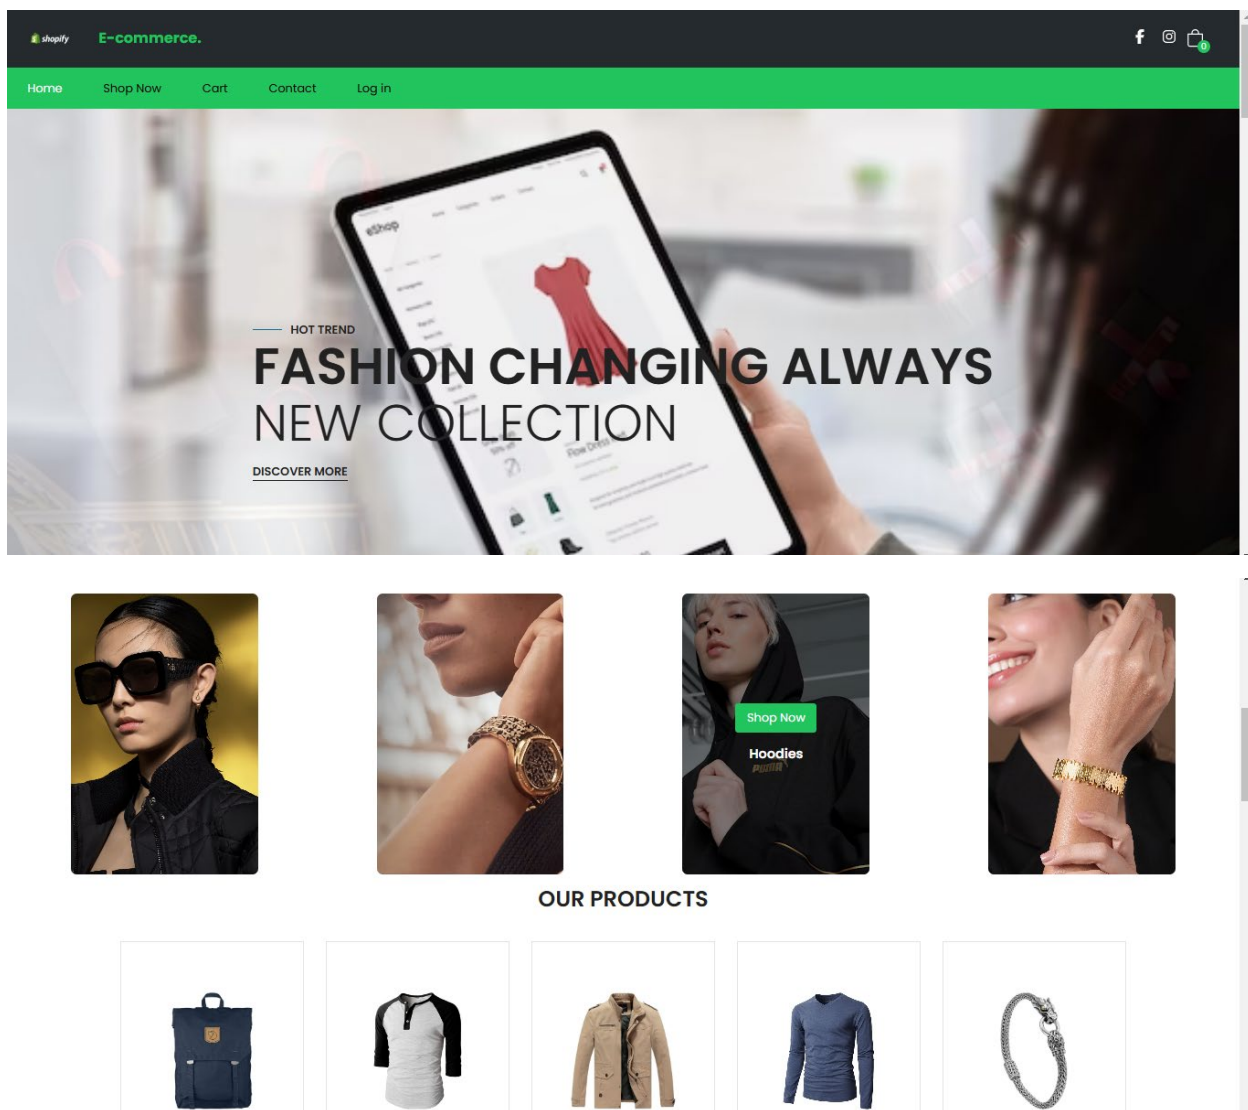

Authentication: JSON Web Token (JWT) is used to conduct secure log in, log out sessions.

Cloud Storage: Videos and other big files are hosted on AWS S3 or Google Cloud Storage.

Screens:

It includes a Header and Footer section. The screens available are Home, Shop Now, Cart, Log in, and Contact, as listed below.
