

Wellkies Website Documentation

Wellkies Health Care Pvt. Ltd.

Wellkies allows a person to make a trip to the doctor without the need of unnecessary requests. Its amazing features help reduce the waiting time in clinics, hospitals and health centres thus helping people consult the doctors quite easily without wasting any time.

Technology Used

React:

Is an open-source JavaScript library used in building user interfaces, especially in the view part of the application. It has a component-based structure, and a virtual DOM for rendering, and updating any of the various user interface elements that it provides.

Material UI:

This is a UI component library that is based on material design guide lines. It provides ready-made and modifiable components for easy creation of appealing and uniform user interfaces.

MongoDB:

Is a database system similar to the traditional database systems but instead of information being stored in tables as in the case of data base management it stores information in the form of documents which allows it to support powerful and flexible queries.

Node.js:

It is a server-side open source and cross-platform runtime environment based on Google Chrome's V8 JavaScript engine. It's mainly used for server-side building, such as running JavaScript on the server, or creating dynamic web applications.

Express:

It is a lightweight and easy-to-use Node.js framework for developing web applications. It is designed to provide a variety of functions for creating web servers and APIs (Application Programming Interfaces), including routing, server-side processing of client requests and more.

Mongoose:

This is an ODM library for Node.js and MongoDB. It gives you an easy MongoDB access and helps in schema, model and query definition.

React Router:

A component-oriented routing library for react that allows routing on the client side. This is allows moving from one page or view to another within a single app page.

Axios:

A promise-based HTTP client for the browser and Node.js. It is a nice API for performing HTTP requests and handling responses.

Bcrypt:

Node.js module a library to hash and salt passwords. It helps storing user passwords safely by creating and checking bcrypt hashes.

JWT (JSON Web Tokens):

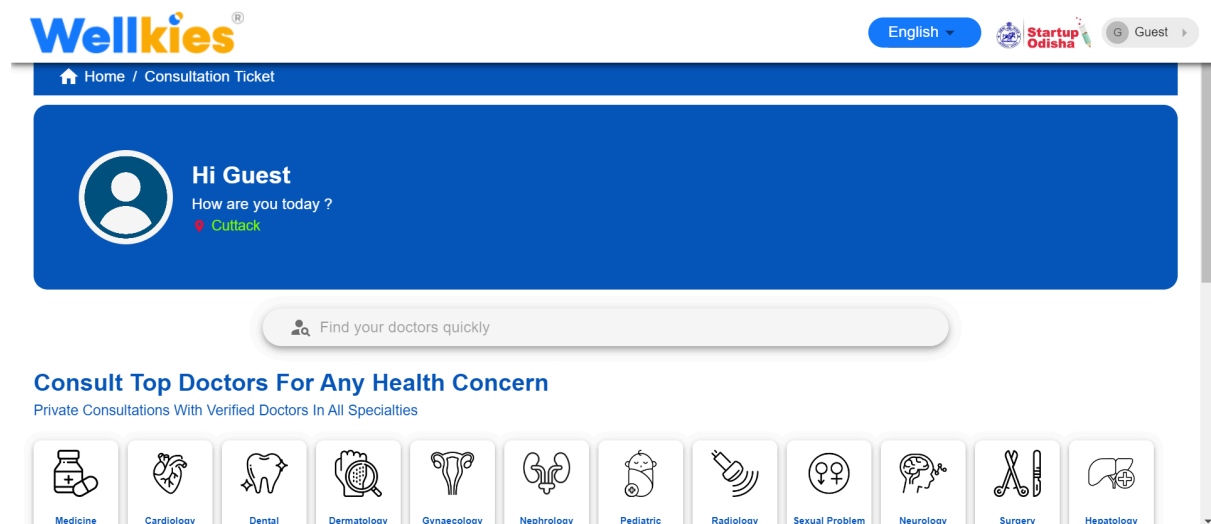

A standard way of creating authentication tokens. This standard enables the creating and verifying of signed for any applications authentication tokens over the web that include hitherto signed up users in them.

Introduction

This is a unique online application which focuses on enhancement in doctor patient relationship and makes it further less complicated with features like medical consultations, radiology tests and many more. These range of activities and functions aims at improving the healthcare experience in the case of patients and the medical treatment providers as well. Now let's see what we have done in this project as follow:

1. Doctor-Patient Consultation:

This website aims to provide an effective platform for the patients and doctors to be located in different geographical locations to engage in doctor patient consultations from the comfort of their homes. The patients will be required to sign in, scroll the full list of available doctors, and select the most convenient time for their virtual appointments. With such options, seeking doctors' expert advice seems to be more of a walk, literally, than a journey, thanks to technology.

2. Find the Nearest Doctor:

This website also features an efficient doctor search application which allows the patients to search and nearest doctors within their locality. They are given the option to select their area or

city from where they want to get treated and the doctors within that range appear and they are also able to see the details of each of these doctors including their pictures which help them to select the appropriate doctor.

3. Today's Appointments:

To ensure patients never miss their appointments, This website prominently highlights any appointments scheduled for the current day. Patients will see a specific section on their dashboard that displays their appointments scheduled for today. With this feature,

patients

4. Upcoming Appointments:

Patients will be guided through their accounts to their personal dashboards upon logging in. A portion of the dashboard will be devoted to showing the patient's forthcoming appointments. This area outlines, time, and particulars of the patients' appointments or testing procedures in an organized manner. Patients also focus their attention on this part of the interface in order to know

when they need to see a doctor next.

5. Past Booking History:

Once patients log in to their accounts, they will also be able to see their respective dashboards. Over the course of the dashboard, there will be a section, which will allow the patients to check their booking history. This feature allows patients to keep in depth history of all the appointments attended, stating the date, time and doctor seen.

6. Prescription Access:

In addition to the booking history, the patients are also allowed to view the prescription history through their profiles. In the column of detail concerning the appointment, the patients will encounter a segment meant for prescriptions. They can access the prescriptions made by the

respective doctors who attended to them, that way knowing what other centers have prescribed to them before. This enables patients to know how to look out for and use their previous prescriptions efficiently in case they need them.

The screenshot displays the 'Appointment Details' page of the Wellkies app. At the top, the Wellkies logo is on the left, and navigation options for 'English', 'Startup Odisha', and a user profile for 'Jatin' are on the right. A blue header bar contains the breadcrumb 'Consultation Ticket / Past Appointment / Appointment Details'. The main content area has a blue background and features a circular profile picture of a female doctor. To the right of the image, the text reads 'Dr. WellkiesTest Doctor', 'Wellkies Hospital', 'Time: 10:34 PM', 'Date: 21-05-2023', and 'Day: Sunday'. Below this is an orange 'CONSULT AGAIN' button with a calendar icon. The bottom section, titled 'Patient Details' on a light grey background, lists: 'Name: Jatin', 'Age: 25 years', 'Gender: Male', 'Mobile: 8917290495', and 'Appointment ID: 6463accefeeeaa30b0706821'.

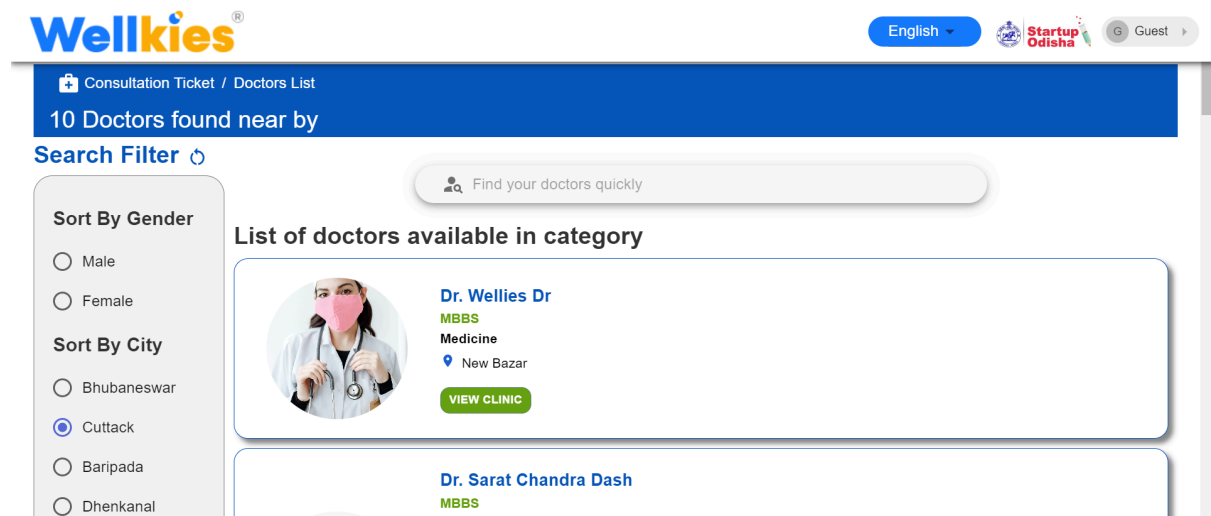

7. Appointment Reminders and Notifications:

We appreciate how important it is to remain disciplined and not forget any particularly important medical appointments. The site has an automated system for sending guarantees, appointment reminders, and notifications to clinics, doctors, and patients for easier management of schedules and smooth flow of consultations

8. Doctors List:

The Doctors List is a detailed collection of practitioners who are available for patient consultation and their particulars. It gives the users in depth details of the doctors, and therefore assists them

in choosing the best doctor possible.

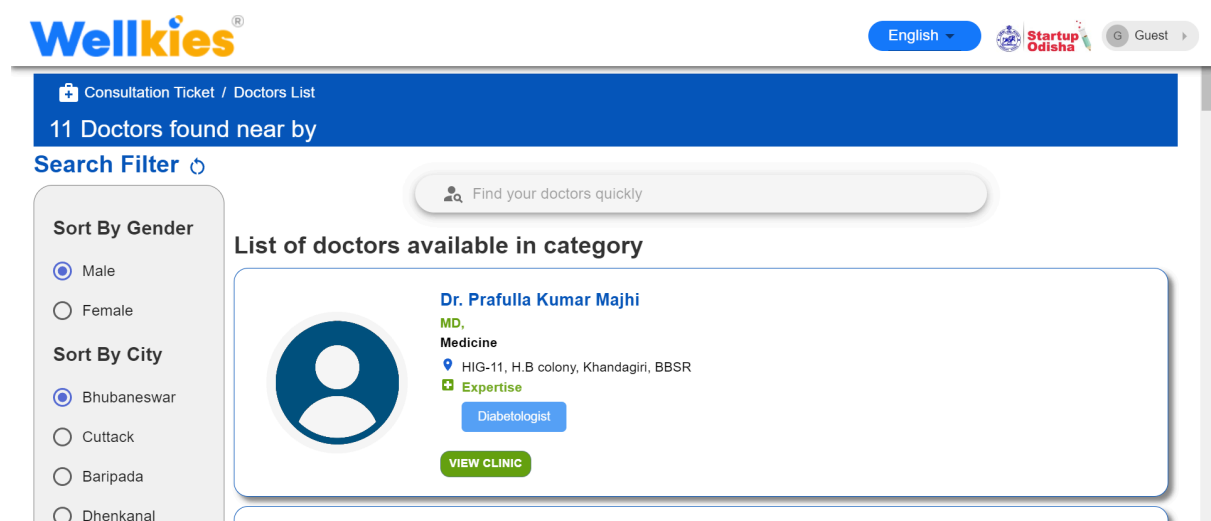

9. Filter Doctors:

The functionality of the Doctors List permits users two major benefits - filtering doctors and searching for general practitioners. These features improve the overall usability of the application and make it possible for patients to locate their desired doctors easily. The following explains the mechanisms in use:

Search Doctors by Name: a. Name Search: A patient can input a specific doctor's name that she is searching for in the search bar provided. This feature is beneficial in that narrowing down on a doctor does not require the user to scroll through the entire doctor's directory.

b. Auto-Suggestions: The search bar may come with auto-suggestions or predictive text when patients are looking for a specific doctor in the search box.

10. Clinics List:

After selecting your desired doctor from the Doctors List, the Clinic Selection feature found on the doctor consultation page allows users to select the clinic they wish to visit for the consultation. This feature provides the patient with several clinics, or rather medical facilities, affiliated with the doctor the patient has selected so that there are no challenges in accessing health services.

11. Time Slot Selection - Schedule Your Consultation:

After that, once you select your preferred clinic from the Clinic Selection option, the Time Slot Selection option on the doctor's consultation page enables you to fix appointment with the doctor by selecting a suitable time slot. This feature allows that an appointment time with the doctor that suits your schedule can always be found. Continue reading to find out more about the Time Slot

Selection feature.

The screenshot shows the Wellkies website's appointment booking page. At the top, there is a navigation bar with the Wellkies logo, a language dropdown set to 'English', and a 'Startup Odisha' logo. Below the navigation bar is a blue header with the text 'Consultation Ticket / Doctor Details / Time Slot'. The main content area is titled 'Select Date and Time'. It features a doctor's profile card for 'Dr. Wellies Dr' (Medicine, Wellkie Clinic, ₹600) with a placeholder image of a doctor. Below the profile, there is a section 'Select date for Appointment' with two buttons: 'Thursday 15th Jun 2023' (highlighted in orange) and 'Sunday 18th Jun 2023'. Underneath, it says 'Slots available for this day' and shows the time range '11:17 AM-11:47 AM'.

This screenshot shows the 'Select date for Appointment' section of the Wellkies website. It features two buttons for 'Thursday 15th Jun 2023' and 'Sunday 18th Jun 2023'. Below these, it says 'Slots available for this day' and shows the time range '02:06 PM-05:06 PM'. A legend indicates that grey boxes are 'Not Available', white boxes are 'Available', and blue boxes are 'Booked'. A grid of time slots is displayed, with the first row containing slots from 02:06 PM to 02:46 PM. The slot '02:16 PM (3)' is highlighted in blue, indicating it is booked. The second row contains slots from 02:51 PM to 03:26 PM. The third row contains slots from 03:31 PM to 04:06 PM. The fourth row contains slots from 04:11 PM to 04:46 PM. The fifth row contains slots from 04:51 PM to 05:01 PM.

12. Appointment Booking Form:

Appointment Booking Form: In order to maintain a straightforward booking procedure, the doctor consultation page may tell patients to sign in before advancing to time slots and other booking information. Attackers will be drawn to the Time Slot Selection functions, but this user will be

atypically unhelpful. Instead, most British Airways customers will receive one-time codes.

The screenshot shows the 'Wellkies' website interface for booking a consultation. At the top, there's a header with the 'Wellkies' logo, a language selector set to 'English', a 'Startup Odisha' logo, and a user profile icon labeled 'Jatin'. Below the header, the page title is 'Booking Details'. On the left, there's a doctor's profile for 'Dr. Wellies Dr' at 'Wellkie Clinic', with a consultation time of '02:41 PM' on '18th Jun 23 Sunday'. The main form area has two tabs: 'FOR SELF' (selected) and 'FOR OTHER'. The form fields include: 'First Name' (Jatin), 'Last Name', 'Email', 'Mobile Number' (8917290495), 'Age', 'Weight(kg)', 'Height', and 'Gender' (radio buttons for Female and Male). The 'Payment Method' section has two options: 'RazorPay' and 'Pay at Clinic' (selected). At the bottom, there are two buttons: 'BOOK NOW' (blue) and 'GO BACK' (red).

13. Appointment Confirmation:

Upon completing the booking process on the doctor consultation page, users can expect to receive confirmation notifications through direct messages (DM) and WhatsApp. These channels of communication provide convenient and immediate confirmation of the appointment details, ensuring a seamless experience for patients.

14. User Profile Edit:

The Edit Profile feature provides users with a form or interface to modify their profile information. Common fields that can be edited include:

Name: Users can update their full name or make changes to their display name.

Contact Details: Users can edit their email address, phone number, or other contact information.

Profile Picture: Users can upload a new profile picture or change their existing one.

Bio or Description: Users may have the option to add or modify a brief bio or description about themselves.
